Analyze & Troubleshoot Construction Schedules

2-Day Class Outline

Assess and solve common schedule-related problems
Learn from a real-world practitioner and certified industry expert with over 30 years' experience
Valuable lessons for all schedulers, project engineers, project managers, superintendents
SureTrak™ software is used for scheduling examples but prior knowledge or access to the software is not required

“Larry Aaron is extremely knowledgeable, an excellent presenter, and has mastered the subject matter. He helps you to think outside the construction box.”

- ™ Adjust your schedules to portray reality
- ™ Fix common schedule problems and mistakes
- ™ Learn how to control your software and output; not let it control you
- ™ Learn how to reduce schedule duration and raise profit margins
- ™ Document schedule delays and associated liquidated damages
- ™ Force activities to be critical or to take place on specific dates
- ™ Split activities that have started and need new logic
- ™ Master difference between “retained logic” and “progress override”
- ™ Build a work breakdown structure that meets contract requirements
- ™ Cost-load schedule and maintain a schedule of values
- ™ Control calendar day vs. work day calculations
- ™ Constrain early and late dates—differences and advantages
- ™ Hide/show rows, data columns, bar charts
- ™ Make the output fit the page
- ™ Powerful tricks using filters
- ™ Scheduling tips, tricks...and traps
